Summary

Over 6 years 7 months of experience delivering great user experiences across desktop, mobile, tablet and other channels.

I work in highly collaborative environments with cross-disciplinary teams to deliver informed and iterative design solutions.

My specialties include user research, usability testing, interaction design and user interface design.

An adherent follower of contemporary design trends; Windows Metro Style, iOS7, Android, Flat UI.

An eye for aesthetics, typography, color theory and pixel perfection

Extensive knowledge in cross browser and OS compatibility tricks and hacks

Roles & Responsibilities

Prepare low fidelity prototypes of applications/features for internal review and brainstorming.

Capable of gauging technical feasibility of the prototype.

Present high fidelity designs/mock-ups to the customer for review/iteration/approval.

Engage with the business development team and/or customer early on to seek a deeper appreciation of the customers' business problem/goals.

Capable of working directly with customers in an iterative/agile manner to dramatically improve the prototypes in a short time

Overall responsibility for understanding customer's brief and converting that into appealing and highly usable interfaces.

Implementing Responsive Web Design feature
